

IDelegate< typename >

```
classDiagram
    class IDelegateTypename["IDelegate< typename >"]
    class IDelegateReturn["IDelegate< Return(Args...)>"]
    IDelegateReturn --|> IDelegateTypename
```

The diagram illustrates a class hierarchy. At the top is a class box for `IDelegate< typename >`, which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below this is a class box for `IDelegate< Return(Args...)>`, which is shaded gray and also divided into three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains the text `+ Execute()`. An orange arrow points from the top of the lower class box to the bottom of the upper class box, indicating inheritance. To the right of the arrow, the text `< Return(Args...)>` is written in gray.

< Return(Args...)>

IDelegate< Return(Args...)>

+ Execute()
